
PreACT Results

- All 9th and 10th grade students took a PreACT (practice ACT) in April.
- Your score report indicates a PreACT composite score (1-35 scale) and a predicted composite score range on the ACT (1-36 scale)
- Also indicated on your score report are scores and ACT predictions for each test area (Math, Science, English, Reading).
- Your results for each question provides feedback to help you continue building skills in each area.
- The results of the ACT Interest Inventory will offer you a personalized view of interests with college and career alignment.

Student Report

Your PreACT™ Composite Score is 19

This graph visually represents your PreACT scores compared to the ACT Benchmark. When looking at this you can see where your score compares to the ACT College Readiness Benchmarks.

- Your PreACT Score
- Your PreACT Score Range
- ACT Readiness Benchmark

Your PreACT scores consist of different scores for each subject test (math, science, English, and reading) along with the average of all of your subject scores (the Composite score). The STEM score is the average of your math and science scores only.

Your PreACT Score Range

Test scores are estimates of your educational development. Think of your true achievement on this test as being within a range as shown by the bands around your scores.

ACT College Readiness Benchmarks

ACT scores at or above the Benchmark mean that a student has at least a 50% chance of obtaining a B or higher or about a 75% chance of obtaining a C or higher in specific first-year college courses in the corresponding subject area.

Your Predicted ACT Composite Score Range is 18–21

The scores below predict your future performance ranges when taking the full ACT in a year's time assuming typical achievement growth.

Your Detailed PreACT Results

The scores below represent your performance on reporting categories measured by the test. Reporting category designations are provided to help you to start to focus on strengths and weaknesses. Categories with only a few items may be less representative of your overall achievement in that category.

MATH

Shaded areas are a result of your responses from the interested inventory. If region 99 is shaded then career interest was inconclusive.

Your Education and Career Journey

The Career Map shows 26 Career Areas (groups of similar occupations) according to their basic work tasks: working with People, Things, Data, and Ideas. The Career Map is divided into 12 regions. Each region has its own unique mix of work tasks. For example, Career Area P (Natural Science & Technologies) mostly involves working with Ideas and Things. What do you think Career Area C involves?

Your Interests

Your interest inventory results are shown on the Career Map. The shaded regions show the kinds of work tasks you prefer and the Career Areas you may like. Visit www.actprofile.org to find out more about occupations in these Career Areas.

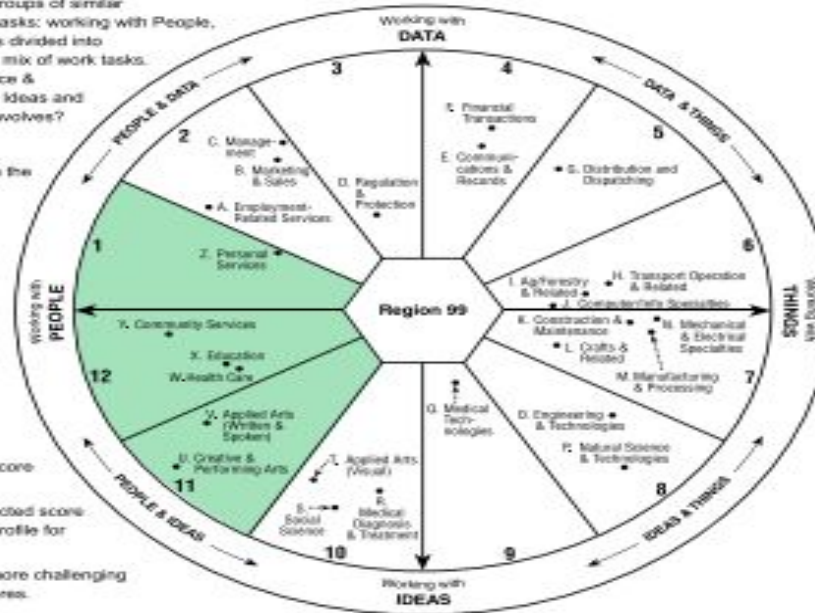

On Track?

Your Predicted ACT Composite Score range: 18-21

Profile for Success: You told us you prefer Career Area C: Management. Successful college students in majors related to this Career Area often have an ACT Composite Score in the range of 21-25.

Compare your Predicted ACT Composite Score range to your Profile for Success:

- You're on track for success if your predicted score range overlaps with, or is above, your Profile for Success score range.
- Improving your study skills and taking more challenging courses may help you improve your scores.

Your Interest-Career Fit

Do your interests fit the Career Area you prefer? You told us:

Management

We compared your Career Area to your interest inventory results. You are somewhat interested in the kinds of work done in this Career Area. Workers are often more satisfied when their interests fit the kinds of work they do.

Ideas for Progress

Number & Quantity

- recognize, identify, and apply basic properties of real numbers (e.g., commutative, associative, identities)

Algebra

- evaluate algebraic expressions and solve simple equations, using integers for Algebra

Functions

- use function notation to create equations that model real-world and mathematical problems

Geometry

- find area and perimeter of triangles and rectangles by substituting given values into standard geometric formulas

Statistics & Probability

- gather, organize, display, and analyze data in a variety of ways for use in problem solving

What's next?

- The flyer contains more information about your score report
- Look at the problems you missed in the test booklet
- 10th graders will take a practice ACT fall of junior year
- 9th graders will take the PreACT again in the Spring of 10th grade
